

Sikkens Autowave

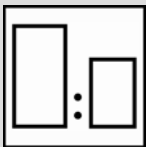

Since January 1st 2007, strict limits apply to the levels of VOC's in paint products. Sikkens Autowave is the perfect answer. Based on the latest waterborne technology, Sikkens Autowave allows you to cut back solvent emissions by more than 85%. And that's not the only benefit: Our waterborne basecoat is just as easy to apply as solventborne basecoat – without compromising on quality!

Increased profitability

Autowave can help you run a more profitable business. Due to Sikkens unique waterborne binder technology, it is easy to apply and dries fast. And because with Autowave you need fewer coats, you save on application time and material as well.

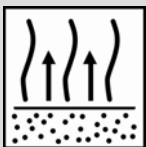

Gently shake before use

100 Autowave
10-20 Activator WB

Metallics: full-, intermediate-, drop coat
